SECRETARY BERGLAND ANNOUNCES SET-ASIDE PROGRAM FOR 1979 WHEAT CROP - Secretary of Agriculture Bergland has announced a 20 percent set-aside program for the 1979 wheat crop, identical to this year's program. By complying with the announced set-aside, wheat farmers will be eligible for a wheat loan of $2.35 a bushel, and a target price of $3.40 per bushel, also the same as the 1978 program.

Secretary Bergland called the 1979 program a "stabilizing measure designed to benefit both producers and consumers."

"If farmers use the 1979 program as well as they did this year, we believe that farm wheat prices will be maintained," the Secretary said. "This program is also anti-inflationary. These provisions will not add to food price inflation," Secretary Bergland said. "USDA studies show that no set-aside in 1979 would result in U.S. wheat stocks being well above needs, considerably lower farm prices, higher

decrease in export earnings from wheat," Bergland added. "Good farming practices in the 20 percent set-aside should result in wheat stocks on June 1, 1980 near 7.5 percent of the projected world wheat use or approximately 1.134 billion bushels," he said. The Secretary reiterated the President's commitment to wheat reserves of 550 million bushels, including the farmer-owned reserve and the special emergency reserve for food aid commitments of 150 million bushels. "This Administration will continue to take actions that will ensure a strong family farm system, our commitments to world food security, and our reputation as a dependable supplier of quality products in world markets." Bergland concluded, "The world situation that we're facing this year is not unlike last year's. The successes of the 1978 wheat program - the set-aside, the loan and farmer-owned reserve programs, and disaster and defieiency payments - provided conclusive evidence that our basic policies and programs should be continued. The average season farm price for the 1978 wheat crop is expected to be about $2.75 a bushel - up from $2.31 for the 1977 crop. I'm certain that farmers will concur in our decisions to continue these programs.

The 20 percent set-aside means that for every 100 acres of wheat planted for harvest as grain, 20 acres must be set aside.

The 1979 program will permit wheat farmers to graze their planted wheat for six months of the year, however, a graze-out and haying program has not been included in the program. The national program acreage of 87.1 million acres is the number of acres of wheat needed to be planted in order to produce enough for expected domestic and export needs and carryover.

The Secretary announced a voluntary reduction of 15 percent for 1979 wheat. Program participants who reduce their 1979 planted acreage by at least 15 percent from their 1978 acreage will be eligible for target-price coverage on 100 percent of their 1979 planted wheat acreage. The program will give credit to farmers who reduced their acreage in 1978 so that their base for 1979 reduction will be the same as it was in 1978.

FLUE-CURED EXPORT PACE STEADY - With firm demand overseas, U.S. flue-cured exports this marketing year are exceeding last season's levels. For July through April, exports totaled 492 million pounds, compared with 445 million in the same periods of a year earlier.

Among the three leading destinations for U.S. flue-cured tobacco, Japan and the United Kingdom each took more in July-April but West Germany took less. Italy's purchases also are rising in the 1977-78 season. While rising U.S. prices are encouraging EC manufacturers to import from sources enjoying preferential duties, the flavorful U.S. tobacco is still desired in blended cigarettes. Disappearance or flue-cured tobacco in 1977-78 is expected to reach or exceed the 1,148 million pounds used in 1976-77. These prospects are close to the last season's marketings but still about 12 percent below the record set in 1973-74.Carryover may approach a year earlier, but stay one-fifth below the 1965 record.

During July 1977 - May 12978, 244 million pounds of loam stocks were sold, substantially above the low level of the previous 2 years. Unsold stocks on June 30, 1978, totaled 550 million pounds, compared with 565 million a year earlier. The record was 960 million on January 1, 1976.

FLUE-CURED MARKETS OPEN - Virginia's Old Belt Flue-Cured Tobacco Market opened August 15 at five of the ten outlets with leaf selling almost $30 per 100 pounds higher than on opening day last year.

Virginia's opening day sales totaled around 2 million pounds for an average of $105.86 per 100 pounds. Last year's opening day sales averaged $75.95 per 100 pounds.

Prices are expected to increase as growers bring upper stalk tobacco which is higher in quality and cleaner. Virginia growers are said to have their best crop of flue-cured tobacco since 1974.

Miss White Was Member of Summer Mission Team

Miss Lynn White of Appomattox, a student at James Madison University, was a member of a summer mission program under the direction of the Norfolk Baptist Association.

Dr. John Craven supervises special ministries for the Norfolk association that includes Virginia Beach churches. "This is an extremely talented group," he said of the summer missionaries, "probably the most talented we've ever had."

Lynn was invited to join the ministry because of her eagerness to witness for her faith and Dr. Craven said that she was of special value because of her ability to speak French. We are sure that Lynn found her summer work to be most rewarding.
